

Unique Grounding Solution

Prepared for Nebraska Little League
June 2019

Strong Cap, LLC
strongcap.com | 888.362.4511

You Connect. **WE PROTECT.**

Who We Are.

Maker of the Strong Cap

- A 3-in-1 kit designed to provide long-term protection of ground rod connections.

What We Do.

Strong Cap protects against:

- Exothermic weld failures
- Stray voltage issues
- Corrosion
- Disconnection

The Strong Cap: A 3-in-1 Kit

- **The Clamp:**
 - Highly durable and corrosion-resistant stainless steel acorn connection
- **The Stabilizer:**
 - Water-proof, silicone-based material
 - High density and permanently flexible
 - Physically displaces corrosive environment from connection
 - Non-conductive
 - Does not impact electrical performance
 - Bonds to metal
- **The Cap:**
 - Polyethylene hard case
 - Physically protects connection
 - Non-conductive
 - Waterproof/weather/tamper/UV resistant

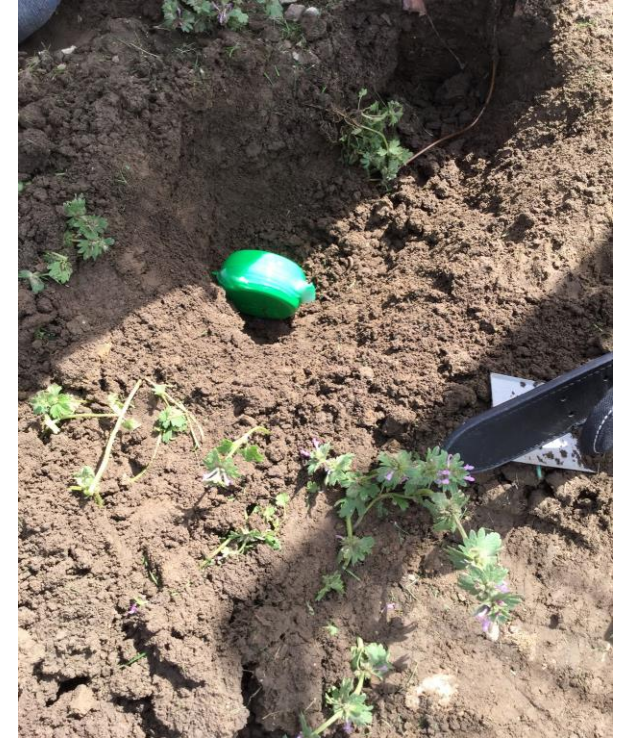

UL tested and approved | U.S. patented
Made in the U.S.A.

Safety & Liability

- **Grounding problems arise from poor connections.**
 - High resistance, broken or corroded connections can create a floating potential and unintended discharge of voltage through a medium, i.e. not ground.
- **Poor grounding is an electrical hazard and liability.**
 - Property damage: equipment, motors, fire, electronics (highly sensitive to low voltage).
 - Injury including shock and potential death.
 - General power loss.

An estimated 80 percent of all electrical failures attributed to poor power quality result from inadequate electrical grounding.

Electrical Safety for Sporting complexes

Hillside Little League Ballpark completed services include:

- Six (6) Strong Cap kits installed
- Two(2) new grounding system (score boards)
- Four (4) grounding services updated (1 of the 4 was a critical failure due to corrosion and disconnect)

Customizable Solutions

- **Above or below grade installation**
- **Configure for any custom connection**
 - Multiple inputs to one (1) Strong Cap case
- **Imprint with company logo and message**
 - Safety message and property ownership is easily identifiable
- **Additional case securing or locking options are available**
 - Prevent/identify tampering
